PROJECTS

Design & Code Club Website | *React, Tailwind*

September 2023

- Assisted in developing components for the Design and Code Club Website. Developing a website to inform on the club and its goals and mission.
- Developed Components for the Club's initial single page site with emphasis on the navigation bar. A reusable Navigation bar to navigate the website while considering the future multi-page layout.
- Assisted in the development of the multi-page website utilizing components and tailwind CSS. Creating a reusable Card Component.
- Challenging implementation of two popular technologies while also adhering to the Clubs ideals and design.
